PROFESSIONAL SUMMARY

AI Developer building production AI systems for an enterprise real estate ERP spanning CRM, marketing, facility and property management, HRMS, finance, and procurement. Specializes in LLM infrastructure, agentic workflows, AI governance, and retrieval-augmented generation (RAG). Experienced in TypeScript, Node.js, and Python, integrating Claude, Gemini, and OpenAI to build secure, reliable AI systems. Holds an MSc in Data Science.

TECHNICAL EXPERIENCE

AI DEVELOPER **Nov 2025 – Present**
ASK Real Estate *Manama, Bahrain*

- Built a **multi-provider LLM gateway** integrating Claude, Gemini, and OpenAI, with per-agent model policies, fallback chains, and Redis-based cost controls; developed an **AI cost ledger** reconciled daily against Anthropic usage data, identifying and fixing three billing faults.
- Designed an **Action Checkpoint** governing 23 AI write and customer-messaging paths with a fail-closed kill switch, alongside PII masking, **prompt-injection defenses**, and security hardening for 8 **MCP** connectors.
- Built **Layla**, a WhatsApp AI sales agent featuring state-machine-driven conversations, per-lead Redis locks, cross-replica message deduplication, hallucination validation, and round-robin meeting assignment.
- Shipped **9 tool-using AI agents** using a **LangGraph ReAct loop** to investigate receivables, approvals, and maintenance issues and draft follow-up communications, with designated actions gated by single-use human approvals.
- Developed **14 LLM-based signal classifiers** across five business domains, using SQL pre-filtering before paid Claude calls; built an **evaluation harness** and a cross-domain Work Queue to prioritize flagged items.
- Built a **property valuation pipeline** with cascading OCR (PDF text extraction, Tesseract, and **Claude Vision**), schema-validated extraction, and embedding-ranked comparables; developed the shared **RAG** core using Pinecone and BM25 re-ranking.
- Conducted an **evidence-based AI platform audit** that found only 21 of 66 catalogued AI features in use; retired unused AI domains and workers and removed 87 orphaned feature flags.

ML RESEARCH INTERN **Sep 2024 – Mar 2025**
National Institute of Technology *Tiruchirappalli, India*

- Researched skin cancer detection on a dataset of **35,000** skin lesion images.
- Used **PCA** (95% variance retained) for linear dimensionality reduction and **t-SNE** to reveal nonlinear cluster structure, comparing both for 2D/3D visualization.

SKILLS

- **Languages:** Python, TypeScript, JavaScript, SQL
- **Agentic AI & LLMs:** Anthropic Claude, Google Gemini, OpenAI, LangGraph, LangChain, Tool Calling, AI Agents, RAG, MCP, Human-in-the-Loop (HITL), LLM Evaluation
- **AI Engineering:** LLM Gateways, AI Governance (PII Masking, Prompt-Injection Defense), Cost Tracking, Document Intelligence (OCR, Claude Vision)
- **Backend & Data:** Node.js, PostgreSQL, Redis, BullMQ, Pinecone, Jest
- **Cloud & Infrastructure:** AWS (EC2, S3, RDS, Bedrock), Docker, Git
- **ML & Data Science:** TensorFlow, Scikit-learn, NumPy, Pandas, Matplotlib, NLP, Deep Learning

EDUCATION

Master of Science in Data Science, *Bishop Heber College* Jul 2023 – Apr 2025
CGPA - 8.38

Bachelor of Science in Computer Science, *Jamal Mohamed College* Aug 2020 – May 2023
CGPA - 8.11

CERTIFICATIONS

Databricks Accredited AI Agent Fundamentals from Databricks Academy | ***Certificate*** 2026
AI Fluency: Framework & Foundations from Anthropic | ***Certificate*** 2026
Azure Fundamentals from Microsoft | ***Certificate*** 2024
